

Taimaa Freahat

Data Science & Artificial Intelligence

Jordan – Ajloun | Phone: +962797926485 | Email: taimafarah746@gmail.com | LinkedIn: <https://www.linkedin.com/in/taimaa-freahat-0275ab30a/>

Github: <https://github.com/taimaa44>

PROFESSIONAL SUMMARY

Recent graduate in Data Science and Artificial Intelligence from Yarmouk University with a strong interest in data analysis, machine learning, and computer vision. Skilled in Python-based data analysis, problem solving, and data visualization. Experienced in AI-based projects, data analysis, and working with real-world datasets using Python and Power BI. Fast learner, highly motivated, and adaptable to new technologies.

EDUCATION

Bachelor's Degree in Data Science and Artificial Intelligence

Yarmouk University – Jordan

Graduation Year: 2026

TECHNICAL SKILLS

- Python (Pandas, NumPy, Matplotlib)
- Excel
- Power BI (Dashboards, Reports)
- Data Analysis
- Data Visualization
- Data Cleaning and Data Quality
- Data Preprocessing and Feature Engineering
- Machine Learning (Supervised & Unsupervised Learning)
- Basic Deep Learning and Computer Vision
- Retrieval-Augmented Generation (RAG) Systems
- Large Language Models (LLMs) Integration
- Frontend Web Development (HTML, CSS, JavaScript)
- Next.js Web Application Development
- Backend Development (Python, FastAPI, REST APIs)
- Full-Stack Web Development (Next.js, FastAPI, REST APIs)
- Problem Solving and Algorithmic Thinking

EXPERIENCE

- Problem Solving using Python
- Applied Python programming to solve analytical and data-driven problems
- Focused on logical thinking, algorithms, and clean code practices
- Worked with datasets to extract insights and perform basic analysis

PROJECTS

AI-Based Driving Evaluation System (DriveSkills)

GitHub: <https://github.com/taimaa44/Ai-Based-Driving-Evaluation-System>

- Developed an AI-powered driving evaluation system using computer vision and machine learning
- Integrated AI models for road analysis, parking evaluation, and driver behavior monitoring
- Built dashboards and result visualization features using modern web technologies

Jordan Traffic Accidents Analysis

<https://drive.google.com/drive/folders/1RFmWavwOS9hsyPGRMoJL2feSIOH8KH1G?usp=sharing>

Analyzed Jordan traffic accident datasets using Python and Power BI

- Created dashboards and visualizations to identify accident trends and patterns
- Performed data cleaning, preprocessing, and insight extraction

Food Analysis Web Application (RAG-Based)

GitHub: <https://github.com/taimaa44/mini-rag1>

- Developed an AI-powered food analysis web application using FastAPI, Groq LLM, and nutrition datasets.
- Implemented a RAG-style workflow to retrieve food nutrition data from CSV files and generate context-aware Arabic recommendations.
- Built features for health scoring, food comparison, similar food suggestions, and personalized nutrition insights.

Quran Smart Guide — AI-Powered Quran Web App

GitHub: <https://github.com/taimaa44/quran-guide-next>

- Built a smart Quran web application using React and Next.js with semantic verse search and AI-assisted recommendations.
- Developed memorization features including recitation practice, audio listening, favorites, progress tracking, and personalized engagement.

LANGUAGES

Arabic: Fluent

English: Intermediate (Working Proficiency)

SOFT SKILLS

Analytical Thinking

Critical Thinking

Teamwork and Communication

Time Management

Adaptability and Continuous Learning
